

"The Chlorine Dioxide People"

Providing you with gaseous chlorine dioxide solutions for your decontamination and sterilization needs

Scrubber Systems

Description

ClorDiSys Solutions offers a broad range of scrubbers to remove chlorine dioxide gas if you have a unique circumstance where direct discharge to the atmosphere is not acceptable. Both our standard carbon and custom sodium thiosulfate scrubbing technologies are available. We have a few standard units available for applications such as isolators, Biological Safety Cabinets (BSC's), Sterilizers, Small Pass-through rooms, and pressure relief systems. Larger scrubbers for large rooms and building decontamination are custom designed for the particular application.

CSI-ROOM017

CSI-SCR-BSC-002

Part #	Description	Dimensions
CSI-SCR-BSC-002	BSC's, Small Rooms, Isolators, Sterilizers	10" x 14.5" x 27" H
