

"The Chlorine Dioxide People"

Providing you with gaseous chlorine dioxide solutions for your decontamination and sterilization needs

Under Door Plate (Part #: CSI-ROOM001)

Description

The Under Door Plate provides a method to connect ClorDiSys Solutions, Inc. gas generators to a room to insert the necessary tubing connections under a door, with NO room/wall/door modifications necessary.

The plate allows for quick valved tubing connections and quick connection of electrical connectors to measure and control the RH for either the Mindox or Cloridox systems.

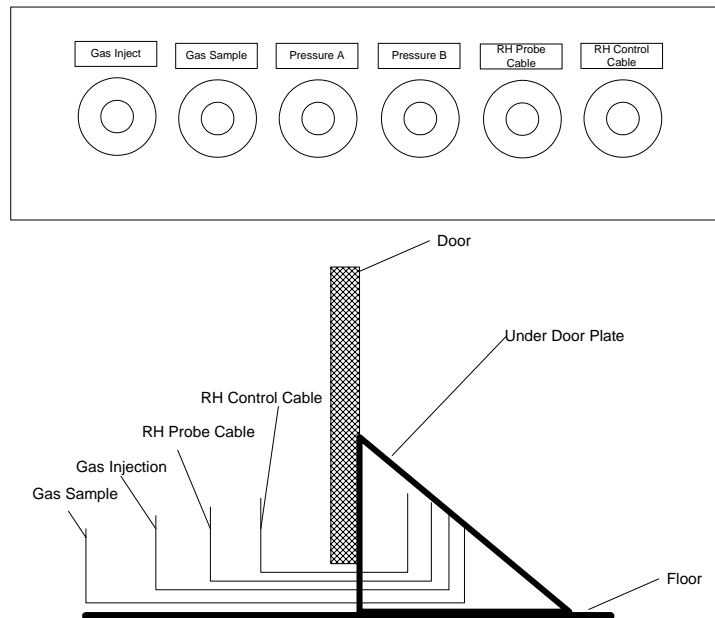

The user only needs one (1) under the door plate since it moves from room to room. This makes the Minidox or Cloridox system installations simple and easy.

Under Door Plate (Part #: CSI-ROOM001)

Unit Dimensions: 8.5" x 8.5" x 24"

Unit Weight: 5 lbs
