

Chlorine Dioxide Gas Decontamination Workshop

You're invited to join us and learn more about chlorine dioxide gas decontamination. Commercially available for over ten years, learn why more and more facilities within the life science, pharmaceutical, food, healthcare, and governmental research industries are choosing chlorine dioxide gas to decontaminate their facilities. At the workshop we'll discuss applications, aspects of safety, material compatibility, efficacy as well as a few case studies regarding some more difficult applications.

We're going to clear the air on CD Gas

Is it corrosive?

Is it hard to use?

Can it kill _____?

Is it safe to use?

Enjoy dinner with us and find out!

When:

October 5, 2011

5:30pm - 10 pm
