

# ULTRAVIOLET LIGHT DISINFECTION

# THE LANTERN

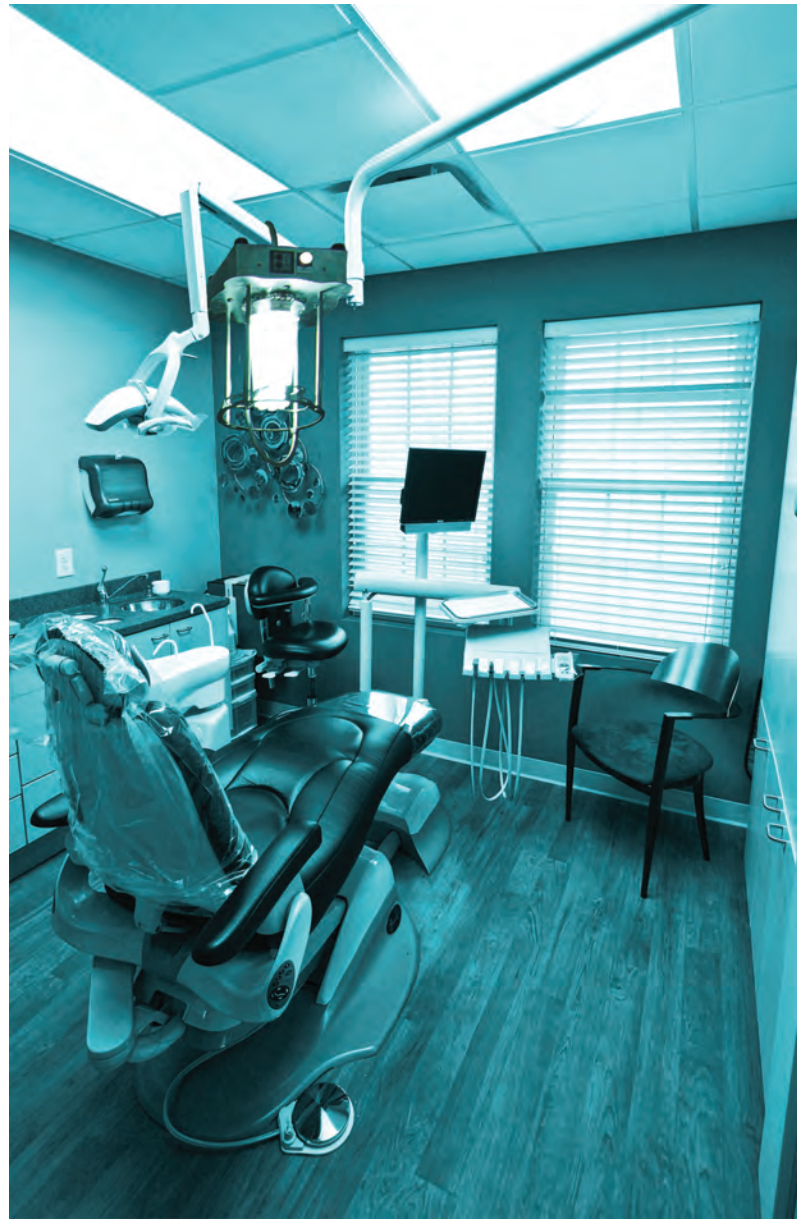

The Lantern provides **rapid** UV-C disinfection to any space, able to **eliminate pathogens anywhere its light shines.**

For the average exam room, the Lantern is able to kill 99% of viruses and bacteria in about **1 minute,** and 99% of spores within **5 minutes.**

This speed allows for quick disinfection between patients.

THE LANTERN IS SIMPLY  
PLACED ON A SURFACE,  
OR HUNG INVERTED VIA  
ITS BUILT IN HOOK.

## WAITING ROOM SOLUTIONS

## EXAM ROOM SOLUTIONS

## BATHROOM SOLUTIONS

**FLASHBAR:** Permanently mounted fixtures that are able to eliminate pathogens with the flip of a switch.

**TORCH:** Portable room disinfection system that is able to eliminate 99% of bacteria and viruses within one minute in a 20' x 20' space, everywhere its light shines. Reposition if necessary and perform additional exposures.

**LANTERN:** Portable room disinfection that can sit or hang inverted during disinfection cycle. It is able to eliminate 99% of bacteria and viruses within one minute in an 8' x 8' space. Can be repositioned to treat larger spaces.

**TORCH AIRE- RECESSED:** Continuously kill aerosolized organisms flowing throughout a space, even when occupied. Enclosed UV-C bulbs kill organisms, and trap large particulates that may be flowing with air.
